

More Information

Bike racks are fitted onto most of the buses in the goBay fleet to improve public transport options for cyclists

The bike racks can carry two bikes at any one time

The bike racks are designed to carry bikes with wheels larger than 16" in diameter

There is no extra cost for bikes, which are insured for a maximum of \$2000 while on the rack

Loading/unloading the bike is the responsibility of the cyclist/passenger

Before loading your bike remove any loose items that could fall off while the bus is moving i.e. clothing, drink bottle

Always load/unload your bike from the kerbside, do not stand in the line of traffic

If you experience any problems when using the bike racks please inform the driver immediately

Bus Bike Racks

Easy to use and your
bike travels free

How to use a goBay Bike Rack

Please remember loading and unloading your bike is your responsibility. Always load or unload your bike from the front of the bike rack.

Loading your bike

Advise the driver that you are going to load your bike

1 Squeeze

Squeeze bike rack handle up to release.

2 Lower

Lower rack until horizontal

3 Load

Lift bike onto rack with front wheel facing toward yellow support arm, fit wheels into clearly labelled slots

4 Secure

Raise support arm over front tyre so the hook rests on top of the front wheel

Unloading your bike

Advise the driver that you are going to unload your bike

Release (Reverse of 4)

Unhook and lower support arm from front tyre and lift your bike from the rack

Unload & Raise (Reverse of 1)

If no-one else is using the rack, squeeze handle and fold bike rack back up.
